# **Meladerm Cream Review– For the Treatment of Acne Discoloration**

Do you wish you could look in the mirror and see beautiful, blemish free skin instead of your acne scars?

**Do you want to:**

Feel confident about your skin once again?

Improve the look, feel and health of your skin?

Get compliments on your glowing complexion?

Not find those unappealing acne scars on your face when you look for them?

If acne scars affect your appearance, then today I'm going to share with you a way to fade those scars without having to endure painful laser treatments or using scar removal products that contain harmful ingredients.

It doesn't seem fair that after battling acne, perhaps for many years, that you now have to also battle the scars that it left behind.

Having acne scars on your face definitely affects how you feel about yourself. Many people will tell you that feeling good about yourself is the most important thing in life, because how you feel about yourself will project towards others and will affect every single part of your life. When you do not like yourself, other people will be less likely to, also.

Like it or not, a lot of people's self worth comes from how they are perceived by others, and you definitely know when you're not found to be attractive. But acne scars does not have to ruin your life, you can do something about it.

While there are many options out there for treating acne scars, I came across a product that may be able to help you diminish those bothersome scars, clear up your complexion problems and help you regain your self-confidence.

## What is Meladerm Skin Lightener?

**Meladerm Skin Lightener** is cream that specializes in pigment, and was developed by Civant Skincare. It is a cream complex used to lighten and revitalize the skin while removing hyper pigmentation,

discoloration, and dark spots caused by acne. It took Civant almost four years of testing and trials to develop [Meladerm Cream](#) into a product that could deliver results.

## Meladerm Ingredients

There are a wide variety of Meladerm products available, including skin toner, cleanser, and moisturizer, but all of them are made with all natural ingredients.

Meladerm cream contains no hydroquinone, mercury, steroids, or other harmful substances that could have harmful side effects. Natural ingredients included in the Meladerm formula include:

- Kojic Acid
- Alpha Arbutin
- Bearberry Extract
- Mulberry Extract
- Lemon Juice Extract
- Licorice Extract

The manufacturing process ensures that these beneficial ingredients retain their potency in every step all the way up to the time you apply and use it.

## Does Meladerm Work?

There are many advantages to using [Meladerm fade cream](#); the Civant Skincare Company goes out of their way to make sure their customers can experience naturally effective products. There are a variety of clinical studies for their products that can be downloaded from their website as well as tons of reviews and testimonials from happy and satisfied customers like Rose, who said:

*"I have just started using this cream a few days and already I have seen drastic results. I have been suffering from acne and the scars are terrible. I am getting married soon and did not know what to do about my acne scars because makeup does not hide them very well. Now I can walk down the aisle with total confidence and know that I have even toned, wonderful skin. I think you will get the best results if you exfoliate and wash first then apply Meladerm, wait a few minutes, then moisturize. I use it twice a day. Very quick and effective results. Thank you Meladerm. I will be recommending this product to my friends."*

There are many recommendations for Meladerm Cream and one reason is because it is not only effective but gentle on your skin no matter what your skin type or color.

## **An affordable alternative with no nasty side effects**

Even though a lot of money has been spent in testing and trials for Meladerm, the company has kept the price relatively affordable for everyone. Meladerm skin brightener is also all natural and does not contain any of the harmful ingredients that can be found in prescription acne scar products. You can use it without worry of harmful side effects or risks. It produces fast results as well, with some people reporting noticeable change within only two weeks.

Meladerm is equally effective for those with lighter or darker skin, which is rare for most skin lightening products and can be used on all skin types (sensitive, oily, dry) as well.

Meladerm has been tried and found to be effective for:

- Acne marks
- Old scars
- Hyperpigmentation / Dark discolorations
- Age / Liver spots / Sun spots
- Freckles
- Tans / Sun damage
- Melasma / Chloasma
- Birthmarks
- Dark elbows, knees, underarms, knuckles
- Uneven skin tones

## **Disadvantages and Possible Meladerm Side Effects**

One of the main disadvantages of Meladerm is that it can only be purchased online from the Civant website. While this is convenient, it is not a good option for those who do not like to order online or who do not have a credit card.

Your skin can become sensitive to the light when you use Meladerm bleaching cream, and the product does not contain any SPF to protect your skin. While Meladerm can treat age spots, it is not effective on wrinkles, and is not recommended for long term use.

This is not a miracle product, but it does work for most people in fading acne scars. It's success largely depends on the severity of the scars, how well the user's face reacts to the cream and how diligent the user is in applying and following the instructions.

## **Who Would Benefit Most From This Product?**

[Meladerm pigment reducing complex](#) best benefits those who suffer mostly from skin discoloration caused by acne. If you have excessive scarring and markings, then Meladerm cream could help to lighten the scars, but an additional treatment would be needed to completely eliminate them.

This lightening cream is a wonderful product for those looking for an inexpensive treatment method to help reduce the hyper pigmentation, discoloration, or dark spots that could be a result of acne. If you have incredibly sensitive skin, or are already sensitive to the sun, then Meladerm may not be for you.

My best advice is to get Meladerm if you are looking for an effective acne scars treatment that really works.

## Cost of Meladerm; Where to Buy it

Meladerm skin lightener is available directly from Civant at a cost of \$49.99 for a 1.7oz cream container. This may seem like a lot, but compared to other acne scar products, it is still relatively inexpensive. If you were to apply the cream to your face two times a day, it would take about seven weeks to use the entire container, resulting in a cost of \$1 or less per day. If Meladerm cream is a product that could work for you, that is an average daily cost for an acne scar cream.

There is not a scar removal product on the market today that will diminish your acne scars overnight regardless of the marketing claims.

That is why I strongly suggest purchasing more than one unit or the larger size cream. You will also save 20% when purchasing "Meladerm 3.4 oz" compared to "Meladerm 1.7 oz."

For a comprehensive treatment and to get the best results, I would recommend the "[Meladerm 4 Piece Kit](#)" that contains:

- 3.4 oz Meladerm Cream
- 8.0 oz Facial Cleanser - Gentle daily facial cleanser with natural extracts and antioxidants
- 4.0 oz Facial Toner - Smoothes, tones and purifies the skin after cleansing
- 1 Microdermabrasion Cloth - a special cloth made of "Micro Fiber" material that can rival many costly clinical skin peels

With the 4 Piece Kit you can get the most out of the Meladerm Pigment Reducing Complex to accelerate your scar healing.

If you have been struggling with acne scars and skin discolorations for years and searching for a product that can really help – then I highly recommend you give Meladerm Advanced Pigment Reducing Complex a try. You have a 30-day money back guarantee - Civant Skin Care will issue a full refund, less shipping, on returned products (used or unused). You simply cannot lose buying Meladerm.

Civant Skin Care ships worldwide and you can pay for your Meladerm products via PayPal or Credit Card.
