Zenmed Scar Treatment Kit Review - The Inexpensive Home Microdermabrasion Treatment For Acne Scars

The [Zenmed scar treatment kit](#) is a two-part treatment system that can be used from the comfort of your home to treat not only your acne scars, but the discoloration that is caused by acne as well. After years of trials and case studies, Zenmed has introduced their unique combination of microdermabrasion cream and scar eraser, to offer an inexpensive alternative treatment for those who suffer from the negative effects of acne.

What is Zenmed made of?

The Zenmed acne scar treatment kit boasts only natural ingredients, and has not harmful substances at all. If you have sensitive skin, or want to avoid the possible side effects of prescription acne cream, then the ingredients within Zenmed's scar treatment kit would work well for you. Some of the all-natural substances found within the kits' products include:

- Echinacea
- Witch Hazel
- Birch Bark
- Rosemary
- Sage
- Rose Hip Seed Oil
- Sea Kelp

Advantages

One of the best advantages of the [Zenmed scar treatment kit](#) is its two-part system. Not only does it have a microdermabrasion cream that removes the dead layer of skin on your face, but it also contains a scar eraser serum that targets the scarred tissue of the face and helps to eliminate them in only a few weeks.

Aside from its fast result time, the Zenmed scar healing kit is available at a cost far lower than other intensive acne scar solutions. There are no harmful side effects because of the Zenmed natural ingredient formula, and it is safe to be used by anyone.

Disadvantages

One of the only disadvantages of the Zenmed scar treatment kit is that everyone reacts to it differently. It may take several weeks or even months to see the desired results. It is not nearly as fast as more aggressive treatment methods, but it also does not have the risks associated with those treatments either.

Cost

The cost of [Zenmed's scars treatment kit](#) is \$59.99, and includes a 4 oz. microdermabrasion complex and a 1 oz. skin eraser serum for scar removal. Considering the high cost of regular medical microdermabrasion sessions, the Zenmed kit is a great value.

Traditional treatments from a professional would cost \$300 or more per session, while you can get several treatment sessions from home with this unique kit.

Who Would Benefit Most From This Product?

Zenmed's scars and hyperpigmentation treatment kit is a wonderful product for those suffering from light to moderate acne scarring. It can effectively smooth your skin while restoring even color tone, and eliminating scarring over time. The lower cost makes it affordable to almost anyone, and makes it a wonderful alternative for those who want to avoid expensive treatments that come with risky side effects.
